DATASHEET GRAPHICS
Our requirements on your print data

formdrei
Messe und Event GmbH

digital 4 colour printing

Print data in Tiff format or high-quality print PDF (settings fogra 39 / ISO coated v2)

- Create print data in 1:1 or 1:10 scale.
- Create files in CMYK mode.
- Special colours must be created and named as full tones (e.g. Pantone 143 C)
- Please always create lines with contour lines
- Convert fonts into paths.
- Always reduce individual layers on one background layer.
- Files must have a resolution of at least 72dpi in the final format.
- Do not save files with gradients or transparencies, but send them via PDF printer and then save them.
- Please always attach files in the final with 20 mm trim. Cutting marks are not necessary.

digital film fonts

Print data as PDF file or Illustrator PC up to version CC 2015

- Print data in 1:1 or 1:10 scale.
- Convert fonts into paths.
- Create outlines as hairlines.
- Always reduce individual levels on one background level.

Please note ...

- Printing and production of the banners, prints and plots based on size accuracy, color fastness and delivery date is based on the respective delivery conditions of our printing partners.
- We will not examine any print data that we receive from you with regard to content.
- The dates in consultation with the graphic division are binding. Any extra charges due to a delayed print release will be charged.
- Banners for re-use are stored in a professional way, but a guarantee for intactness on re-use can not be taken.
- If the print data is not created in CMYK or fonts are not converted to paths, we cannot guarantee for any errors that may occur during printing!

Send your files to
Thorsten Böckmann (boeckmann@formdrei.de)

You can make work easier for us...
...by indication of colours in HKS, RAL, CMYK, or Euro scale as well as in line with proofs. ⚠
