

Datasheet graphics

Our requirements on your print data

digital 4 colour printing

Print data in Tiff format or high-quality print PDF (settings fogra 39 / ISO coated v2)

- Create print data in 1:1 or 1:10 scale.
- Create files in CMYK mode.
- Special colours (e.g. Pantone 143 C) must be created in CMYK.
- Please always create lines with contour lines.
- Convert fonts into paths.
- Always reduce individual layers on one background layer.
- Files must have a resolution of at least 75dpi in the final format.
- Do not save files with gradients or transparencies, but send them via PDF printer and then save them.
- Please always attach files in the final with 20 mm trim. Cutting marks are not necessary.
- Create a continuous motif across several walls as one file.

digital film fonts

Print data as PDF file or Illustrator PC up to version CC 2015

- Print data in 1:1 or 1:10 scale.
- Convert fonts into paths.
- Create outlines as hairlines.
- Always reduce individual levels on one background level.

Bitte beachten Sie...

- Printing and production of the banners, prints and plots based on size accuracy, color fastness and delivery date is based on the respective delivery conditions of our printing partners.
- We will not examine any print data that we receive from you with regard to content.
- The dates in consultation with the graphic division are binding. If we do not receive your print data until after the communicated deadline, we will charge a surcharge of 20% for our additional work on graphic productions.
- Banners for re-use are stored in a professional way, but a guarantee for intactness on re-use can not be taken.
- If the print data is not created in CMYK or fonts are not converted to paths, we cannot guarantee for any errors that may.
